### FOREWORD

This guide does not replace or amend any Department of Defense (DoD) instructions, regulations, and/or policies. Its purpose is to assist users with Product Data Reporting and Evaluation Program (PDREP) – Automated Information System (AIS) generic search tool.

Refer to the appropriate PQDR instructions and manuals for information about DoD PQDR program requirements.

**REFERENCES:** 

**PDREP** Data Dictionary

### INTRODUCTION

This document is intended to guide DoD personnel in the use of Product Data Reporting and Evaluation Program – Automated Information System's (PDREP-AIS) generic search tools capabilities.

The PDREP-AIS is accessible via the Product Data Reporting and Evaluation Program home page: <u>https://www.pdrep.csd.disa.mil/</u>

User access and login procedures can be located in the PDREP User Access and Login Procedures guide. First time PDREP users will need to submit a User Access request form, available on the NSLC home page. Click on <u>User Access Request Form</u> to download the form. Follow the directions on the form to submit the request for access to PDREP.

Requests for changes or improvement to any PDREP application or any of the NSLC Portsmouth web pages should be submitted to:

### **Customer Support Desk**

Commercial Phone: (207) 438-1690 / DSN 684-1690 FAX: (207) 438-6535, DSN 684-6535 Email: <u>webptsmh@navy.mil</u>

### Mailing Address Naval Sea Logistics Center Portsmouth Bldg. 153, 2nd Floor, Portsmouth Naval Shipyard

Portsmouth, NH 03804-5000

### **Online in the PDREP Application**

If already a PDREP User, log into PDREP and click on "<u>Submit Feedback</u>" at the top of most web pages.

# 1 The PDREP Search Module

The PDREP Search webpages provide methods for finding PDREP-AIS and DLA records associated with a specified CAGE Code, Contract Number, DODAAC, FSC, NIIN, NSN, or STATE (NCIS Report), ultimately providing details for the records returned by the search. The Search module allows for the viewing of existing records only.

Please note that the data displayed in this user guide is not valid data and is used for testing and display purposes only.

# 2 Accessing the PDREP Search Module

Upon logging into PDREP, the Home page shown in Figure 2.1 will display. The options in the interface will vary depending on the user's level of access. Please refer to the PDREP User Access and Login Procedure Manual for greater detail.

- a. Click the PDREP Search link under PDREP Searches heading.
- b. The PDREP Search form will display (Figure 3.1).

# **3 PDREP Search Parameters**

PDREP Home • Submit Feedback	External Links • PDREP Manuals     User Profile: <u>TEST PLAN</u> • <u>logout</u>							
Product	Data Reporting and Evaluation Program (PDREP)							
	Search							
Instructions Please follow these steps to perform PDREP Search 1. Enter or complete Start Date and End Date a. Correct format for date fields is MM/DD/YYYY or use Calendar 2. Select the data element for Search By 3. Enter the value in Search For 4. Select the Application you wish to perform the search on To limit the search result, enter all the values requested Note: DLA Weapon System Data (EBS) can be searched by NIIN or NSN								
Date Range								
(M) Start Date:	08/06/2013							
(M) End Date:	08/06/2014							
(M) Search By:	CAGE CODE 🗸							
(M) Search For:	Code Lookup							
Output	● PDREP ◎ DLA-CDCS ◎ DLA-QEP ◎ DLA-QNR							
	Search							

### Figure 3.1

- a. The Search settings default as shown above, with the End Date set to the current date, and the Start Date defaulted to one year prior. The search dates may be changed manually, or by using the calendar control to the right. The interface requires the date be formatted as mm/dd/yyyy.
- b. The Search By drop-down selector defaults to CAGE CODE. However other selections available are: Contract Number, DODAAC, FSC, NIIN, NSN, and State (NCIS Report).
- c. The Search For field qualifies the value entered in the Search By box. In this instance, because the default search is by CAGE Code, the user would enter the CAGE Code to search for in the Search For box.
- d. Select an Output Type by clicking one of the Output radio buttons.
- e. As an example, to search for an Output of type PDREP and a CAGE Code "TPLAN", accept the defaults, enter "TPLAN" into the Search For box, and Click the Search button. The results display in the table at the bottom of the page (Figure 3.2).
- f. The sections to follow will describe the result sets returned for each Output type.

Figure 3.2

# 4 PDREP Output

Whether the user chooses to search by CAGE CODE, Contract Number, DODAAC, FSC, NIIN, NSN, or State (NCIS Report), the same record types will be returned. For the PDREP output, these record types (shown in the screenshot above) are: Approved Parts List (APL), Bulletins, Contract Award and Delivery Data (CAD), GIDEP Alerts, Laboratory Information Management System (LIMS), Material Inspection Records (MIR), Product Quality Deficiency Reports (PQDR), Qualified Products List (QPL), Requisition, Special Quality Data (SQD), Supplier Audit Program (SAP), Supply Discrepancy Report (SDR), Surveys, Test Reports, and Warranty Tracking.

Please refer to the User Manual for the module of interest for more detailed information regarding using each module for originating, working with, and tracking specific records.

The numbers of records in each module, associated with the specified search parameter for the date range provided are displayed in the result set. A zero in the Records column indicates there are no records in that module associated with the search parameter within the specified date range. Results may be returned by expanding the date range, or selecting a different Search By parameter. Clicking the hyperlinked number in the result set will redirect the user to information about those records.

# 4.1 Approved Products List (APL)

In the example below, we have specified the Search By field as "NIIN" and provided a NIIN to search for in the Search For field. The results of the search parameters input return one APL record. To view this record, click the hyperlinked number associated with the APL line item in the PDREP Records result table (Figure 4.1).

The PDREP - APL page displays information about the APL. The top portion of the page displays APL, NIIN, Nomenclature, EI APL, End Item, and UIC information for the selected APL. The table below provides information regarding specific APL line items.

- a. To print the APL Data, click the Print button and specify a printer.
- b. To return to the Search Detail page, click the Back button.
- c. To return to the Search Result NIIN page, click the Back button in the Search Detail page.

Full access to APL records is available through the HEDRS module in PDREP.

# 4.2 Bulletins

In the example below, we have specified the Search By field as "FSC" and provided an FSC to search for in the Search For field. The results of the search parameters input return three Bulletin records. To view Bulletin records, click the hyperlinked number associated with the Bulletins line item in the PDREP Records result table (Figure 4.4).

Bulletins may also be searched by CAGE Code and Serial number in the Bulletin Search page in the PDREP application. Bulletins may only be generated by those with Admin and Bulletin access permissions.

# 4.3 Contract Award Data Results

In the example below, we have specified the Search By field as "CAGE" and provided a CAGE Code of "TPLAN" to search for in the Search For field. The results of the search parameters input return one Contract Award and Delivery Data record. To view the record, click the hyperlinked number associated with the Contract Award and Delivery Data line item in the PDREP Records result table (Figure 4.7).

The Contract Award Data – View Record page displays information about the contract as it pertains to the CAGE Code. The top portion of the page displays contract information, and the table below provides information regarding specific contract line items.

- a. To print the Contract Award Data, click the Print button and specify a printer.
- b. To return to the Search Detail page, click the Back button.
- c. To return to the Search Result CAGE CODE page, click the Back button in the Search Detail page.

Full access to CAD records is available through the Contract Award and Delivery module in the PDREP application.

# 4.4 GIDEP Alerts

In the example below, we have specified the Search By field as "CAGE" and provided a CAGE Code to search for in the Search For field. The results of the search parameters input return seven GIDEP Alert Records associated with the specified CAGE Code. To view these records, click the hyperlinked number associated with the GIDEP Alerts line item in the PDREP Records result table (Figure 4.10).

- a. The Search Detail page returns a list of GIDEP Alert records for the company associated with the search parameter entered in the Search For field.
  - 1. The Search Detail CAGE CODE section provides information about the company associated with the CAGE Code specified. If a different Search By parameter had been selected, this page would appear differently to reflect the parameter used (examples are provided in other sections).
  - 2. The "Lines Items for GIDEP ALERTS" table provides information on the CAGE Code, Serial Number, and Issue Date for each GIDEP Alert record associated with the search parameter used.
- b. Note that although the application data used for display purposes herein is not valid data, the CAGE code links are not displayed in the screenshot above for security purposes. To view a GIDEP Alert record listed in the results table, click the hyper-linked CAGE Code associated with the record. The PDREP GIDEP Alerts page displays (Figure 4.20).

#### Figure 4.12

The PDREP – GIDEP Alerts page displays information about the alert.

- a. To print the GIDEP Alert, click the Print button and specify a printer.
- b. To return to the Search Detail page, click the Back button.
- c. To return to the Search Result CAGE CODE page, click the Back button in the Search Detail page.

Full access to GIDEP Alerts is available through the GIDEP module of the PDREP application.

# 4.5 Laboratory Information Management System (LIMS)

In the example below, we have specified the Search By field as "DODAAC" and provided a DODAAC to search for in the Search For field. The results of the search parameters input return fifty five LIMS records. To view these records, click the hyperlinked number associated with the LIMS line item in the PDREP Records result table (Figure 4.13).

#### Figure 4.14

- a. The Search Detail page returns a list of LIMS records for the DODAAC specified in the Search For field.
  - The Search Detail DODAAC section provides information about the DODAAC specified. If a different Search By parameter had been selected, this page would appear differently to reflect the parameter used (examples are provided in other sections).
  - 2. The "Lines Items for LIMS" table provides information on the Reporting Activity, Serial Number, Specification, NSN, and Added Date for each LIM record associated with the search parameter used.

- b. To view the data associated with an LIM listed in the results table, click the hyper-linked Reporting Activity associated with the Serial Number of interest. A Material Inspection Report View page displays (Figure 4.15).
- c. The Laboratory Information Management System Report displays at the bottom of the page.

- f. To return to the Search Result DODAAC page, click the Back button in the Search Detail page.

# 4.6 Material Inspection Reports

In the example below, we have specified the Search By field as "CAGE" and provided a CAGE to search for in the Search For field. The results of the search parameters input return twelve Material Inspection Reports (MIRs) associated with the specified CAGE Code. To view these records, click the hyperlinked number associated with the Material Inspection Reports line item in the PDREP Records result table (Figure 4.16).

- a. The Search Detail page returns a list of MIR records for the company associated with the search parameter entered in the Search For field.
  - 1. The Search Detail CAGE CODE section provides information about the company associated with the CAGE Code specified. If a different Search By parameter had been selected, this page would appear differently to reflect the parameter used (examples are provided in other sections).
  - 2. The "Lines Items for MATERIAL INSPECTION RECORDS" table provides information on the Reporting Activity, CAGE Code, Serial Number, Low Serial Number, and Inspection Date for each MIR record associated with the search parameter used.
- b. To view the data associated with a MIR listed in the results table, click the hyper-linked Reporting Activity associated with the CAGE Code and Serial Number listed. A Material Inspection Report – View page displays (Figure 4.18).

- c. To print the MIR, click the Print button and specify a printer.
- d. To return to the Search Detail page, click the Back button.
- e. To return to the Search Result CAGE CODE page, click the Back button in the Search Detail page.

Full access to MIR records is available through the Material Inspection Records module of the PDREP application.

# 4.7 Product Quality Deficiency Reports Results

In the example below, we have specified the Search By field as "CAGE" and provided the CAGE Code "TPLAN" to search for in the Search For field. The results of the search parameters input return eight Product Quality Deficiency Report (PQDR) records. To view these records, click the hyperlinked number associated with the Product Quality Deficiency Reports line item in the PDREP Records result table (Figure 4.19).

This will redirect to the Search Detail page shown in Figure 4.20.

a. The Search Detail page provides a list of PQDR records for the company associated with the search parameter entered in the Search For field.

- 1. The Search Detail CAGE CODE section provides information about the company associated with the CAGE Code specified. If a different Search By parameter had been selected, this page would appear differently to reflect the parameter used (examples are provided in other sections).
- 2. The "Lines Items for PRODUCT QUALITY DEFICIENCY REPORTS" table provides information on the SYSCOM, Activity, Serial Number, Sequence Code and Preparation date for each PQDR record associated with the search parameter used.

# 4.8 Qualified Products List

In the example below, the results of the search parameters input return three Qualified Products List (QPL) records associated with the specified CAGE Code. To view these records, click the hyperlinked number associated with the Qualified Products List line item in the PDREP Records result table (Figure 4.22).

	5945	002641		12/27/2006
	5945	000681		02/15/2006
,	5945	000666		02/08/2006

- a. The Search Detail page returns a list of QPL records for the CAGE specified in the Search For field.
  - 1. The Search Detail CAGE CODE section provides information about the company associated with the CAGE Code specified. If a different Search By parameter had been selected, this page would appear differently to reflect the parameter used (examples are provided in other sections).
  - 2. The "Lines Items for QUALIFIED PRODUCTS LIST" table provides information on the CAGE Code, FSC, Serial Number, and Issue Date for each QPL record associated with the search parameter used.
- b. Note that although the application data used for display purposes herein is not valid data, the CAGE code links are not displayed in the screenshots for security purposes. To view a QPL record listed in the results table, click the hyper-linked CAGE Code associated with the record. The PDREP Qualified Products List page displays (Figure 4.24).

CAGE Code:	
FSC: 5945	
Commodity: RELAY CONTACT SOL	
Specification: QPL/QML83536	

- c. To print the QPL Record, click the Print button and specify a printer.
- d. To return to the Search Detail page, click the Back button.
- e. To return to the Search Result CAGE CODE page, click the Back button in the Search Detail page.

Products may only be added to the Qualified Product Lists by those with Admin access permissions.

# 4.9 Requisition

In the example below, we have specified the Search By field as "NIIN" and provided a NIIN to search for in the Search For field. The results of the search parameters input return forty eight Requisition records. To view these records, click the hyperlinked number associated with the Requisition line item in the PDREP Records result table (Figure 4.25).

Requisitions may also be searched by Requisition Number and NIIN in the Requisition Search page in the PDREP application.

# 4.10 Special Quality Data Results

In the example below, we have specified the Search By field as "CAGE" and provided a CAGE Code to search for in the Search For field. The results of the search parameters input return four Special Quality Data (SDR) records associated with the specified CAGE Code. To view these records, click the hyperlinked number associated with the Special Quality Data line item in the PDREP Records result table (Figure 4.28).

Full access to SAP records is available through the Supplier Audit Program module in the PDREP application.

# 4.12 Supply Discrepancy Report

In the example below, we have specified the Search By field as "DODAAC" and provided a DODAAC to search for in the Search For field. The results of the search parameters input return two SDR records. To view these records, click the hyperlinked number associated with the Supply Discrepancy Report line item in the PDREP Records result table (Figure 4.34).

# 5 DLA-CDCS Output

PDREP Home • Submit Feedback	External Links • PDREP Manuals User Profile: <u>TEST PLAN</u> • logout				
Product	Data Reporting and Evaluation Program (PDREP)				
	Search				
Instructions         Please follow these steps to perform PDREP Search         1. Enter or complete Start Date and End Date         a. Correct format for date fields is MM/DD/YYYY or use Calendar         2. Select the data element for Search By         3. Enter the value in Search For         4. Select the Application you wish to perform the search on To limit the search result, enter all the values requested         Note:       DLA Weapon System Data (EBS) can be searched by NIIN or NSN					
Date Range					
(M) Start Date:	01/01/2005				
(M) End Date:	01/01/2007				
(M) Search By:	DODAAC -				
(M) Search For:	W62G2T Code Lookup				
Output	PDREP     DLA-CDCS     DLA-QEP     DLA-QNR     Search				

# Figure 5.1

This search returns a list of DLA Closed and Open CDCS records associated with the Search parameter specified. Record counts are returned associated with the following categories:

- Doc 0 PQDR (CAT 1)
- Doc 1 PQDR (CAT 2)
- Doc 2 Phone Complaints
- Doc 3 SF 364 (DISREP)
- Doc 4 DLA Quality AuditSP
- Doc 5 DD Form 1225 (Storage QC Report)
- Doc 6 SDR (Direct Vendor Delivery)
- Doc 7 SDR (Depot to Customer)
- Doc 8, SDR (Depot Customer Return)
- Doc 9 SDR (Depot Contract Receipt)
- Doc B SF 380 (Type I Medical)
- Doc C SF 280 (Type II Medical)
- Doc D SF 380 (Type III Medical)
- Doc E DD 1938 (GIDEP Alert)
- Doc F DD 1938 (GIDEP Safe Alert)

A zero in the Records column indicates there are no records in that module associated with the search parameter within the specified date range. Results may be returned by expanding the date range, or selecting a different Search By parameter.

Note that the same Search Result page displays regardless of which Search By parameters are selected.

- a. The Search Detail page provides a list of DOC 3 records associated with the search parameter entered in the Search For field.
  - 1. The Search Detail DODAAC section provides information about the Activity associated with the DODAAC specified. If a different Search By parameter had been selected, this page would appear differently to reflect the parameter used (examples are provided in other sections).
  - The "Lines Items for DOC 3 SF 361 (DISREP)" table provides information on the Retrieval Key, Document Type, Contract Number, and Received Date for each DOC 3 record associated with the search parameter used.
- b. Click the hyperlinked value in the Retrieval Key field. In this instance, the DLA CDCS Closed Discrepancies page (for documents of Type 3) displays as shown in Figure 5.4.

Output	◎ PDREP ◎ DLA-CDCS ◎ DLA-QEP ④	DLA-QNR
	Search	

# Figure 6.1

This search returns a list of DLA QNR records associated with the Search parameter specified. Record counts are returned associated with the following categories:

- DLA Quality Notification Data (EBS)
- DLA Technical Data Code (EBS)
- DLA Termination Code (EBS)
- DLA Weapon System Code (EBS)

A zero in the Records column indicates there are no records in that category associated with the search parameter within the specified date range. Results may be returned by expanding the date range, or selecting a different Search By parameter.

Note that the same Report page displays regardless of which Search By parameters are selected.
